

DB-25 to XLR Analog & Digital Rack Panels

EIA 1RU 19 inch Rack mount panel

DB-25 male to XLR interface panels which provides high quality connection points for your analog (D-88 or Yamaha) and digital (AES) gear. Can mount on the front or rear of your rack. Excellent alternative to snake cable designs which end up getting tangled and difficult to trace.

DB-25 interface cable supplied

Available configurations:

AIP-100 _____ 8 analog inputs/ 8 analog outputs

DIP-100 _____ 8 AES inputs/ 8 AES outputs

ADP-100 _____ 8 Analog Inputs 4 AES I/O

DAP-100 _____ 4 AES I/O / 8 analog outputs

Custom configurations also available. Contact factory for details
