

# REM-100 8 Button Lighted Pushbutton Panel

Simple Control Panel for Any Momentary Contact Control Function

REM-100 Eight (8) Pushbutton Control Panel, front panel

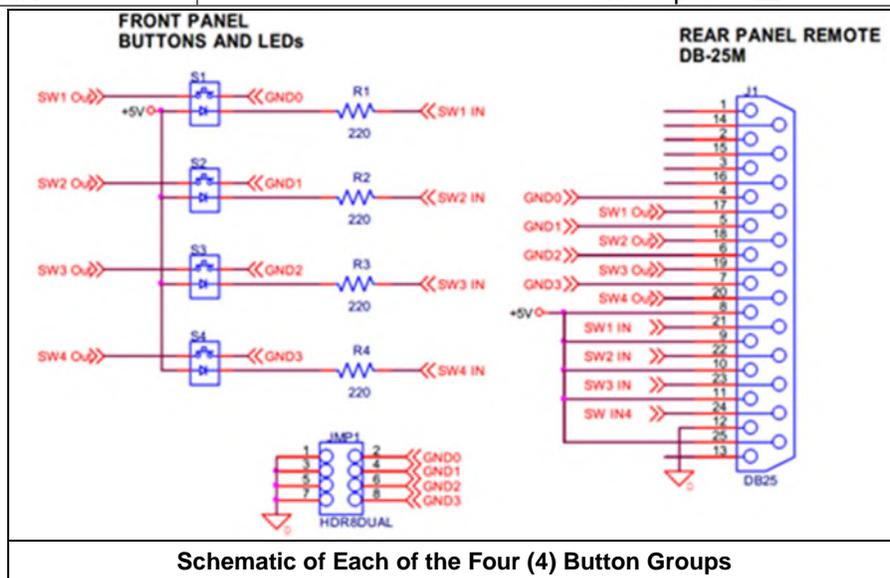

## Product Description

The REM-100 8 Lighted Pushbutton Panel has two groups of four lighted pushbuttons. Housed in a standard EIA single 19-inch rack enclosure, this generic panel can be used for just about any application that requires push-button control and LED status. Each push button is a single pole single through momentary switch. Each switch has an accompanying LED indicator. Both switch contacts are available at the rear-panel connector, allowing isolated connections if desired. There is also a header on the PC board that allows the switches to be configured for common-closure operation, simplifying wiring. The LED indicators are common to a power-supply pin on one side and are each isolated by a dropping resistor on the other. Simply ground the desired LED terminal to light it. In addition to the panel, there is a sturdy steel back bracket that houses two DB-25 connectors for interface to each 4-button grouping. Includes a 6-foot (1.8 meter) interface cable with DB25 male connectors at each end. The panel comes without labeling or overlay. If you require a custom overlay for your project, please contact us, and we would be happy to quote custom artwork.

## Technical Specifications

## REM-100

<b>Number of buttons:</b>	Eight (8) in two (2) groups of four (4) lighted pushbuttons
<b>Contact Type:</b>	Momentary
<b>Contact Rating:</b>	30 VDC @ 2Amperes
<b>LED Voltage:</b>	5 to 24 VDC (5 to 12 VDC recommended)
<b>Output Connector:</b>	DB-25 Male
<b>Humidity:</b>	95%, Non-condensing
<b>Mechanical Dimensions:</b>	19 in W x 2.25 in D x 1.75 in H (483 mm W x 57 mm D x 44 mm H) Standard One EIA Rack Unit Enclosure
<b>Shipping Dimensions:</b>	22 in W x 4 in D x 7 in H (559 mm W x 102 mm D x 178 mm H)
<b>Shipping Weight:</b>	2 lbs. (1 kg)
<b>Ordering Part Number:</b>	SWP Option #22
